Dear Sir,

With reference to the above subject, please find enclosed herewith Six-Monthly Environment Clearances (EC) compliance status report along with monitoring report etc. for the period of **April'2024 to September'2024** in soft (e-mail).

Poly-silicon manufacturing plant construction work yet to start.

This is for your kind information & record please.

Thanking You. Yours faithfully, for **Mundra Solar Technology Limited**

| 28. | The fugitive emission in the work zone environment shall be monitored. The emission shall conform to the standards prescribed by the concerned authorities from time to time (e.g. Directors of Industrial Safety & Health). Following indicative guidelines shall also be followed to reduce the fugitive emission. > Internal roads shall be either concreted or | MSTL will take appropriate measure to control fugitive emissions. Internal pucca Roads is already constructed to reduce the fugitive emission during vehicular movement. Air borne dust will be controlled with water sprinklers at suitable locations in the plant. A green belt will be developed all around the plant boundary and also along the roads to mitigate fugitive & transport dust emission. |
| 29. | Regular monitoring of Volatile Organic Compounds (VOCs) shall be carried out in the work zone area and ambient air. | , |
| 30. | For control of fugitive emission, VOCs, following steps shall be followed: a. Closed handling and charging system shall be provided for chemicals b. Reflux condenser shall be provided over Reactors / Vessels. c. Pumps shall be provided with mechanical seals to prevent leakages. | MSTL has proposed closed handling and charging system for chemicals & reactors. |
| 31. | Air borne dust at all transfers operations/ points shall be controlled either by spraying water or providing enclosures. | |
| 32. | Regular monitoring of ground level concentration of PM2.5, PM10, S02, NOX, HCI, CI2, H2 & VOC shall be carried out in the impact zone and its records shall be maintained. Ambient air quality levels shall not exceed the standards stipulated by the GPCB. If at any stage these levels are found to exceed the prescribed limits, necessary additional control measures shall be taken immediately. The location of the stations and frequency of monitoring shall be decided in consultation with the GPCB | Manufacturing Cluster (EMC) premises within APSEZ a Mundra, Kutch. Regular monitoring of ground level concentration of PM2.5, PM10, SO2, NOX, is being carried out by the consultant and report is enclosed as Annexure- I. |
